

# Boral TruExterior™ Siding and Trim

## TECHNICAL BULLETIN - CONSTRUCTION ADHESIVES AND SEALANTS

**This table is not a comprehensive list of compatible adhesives, caulks and sealants, nor is it intended to be an endorsement of the below listed products by Boral Composites Inc. (“Boral”).**

The table below contains recommendations provided to Boral by adhesive and sealant manufacturers. Boral does not specify brands and will not warrant or accept liability for the performance of field-applied adhesives, caulks and sealants. The products have been tested by the respective manufacturers and the manufacturers have found them to be compatible with Boral TruExterior™ Siding and Trim. Please follow manufacturer guidelines for prep and application of these products.

**NOTE 1:** Based on test results, 2-part acrylic construction adhesives such as Extreme Adhesives Fast Cure PVC TrimWelder should be avoided.

**NOTE 2:** Water-based adhesives, while compatible, are not recommended due to the low water absorption properties of Boral TruExterior™ Siding and Trim. Extended drying times are often required for proper adhesion when using these products.

**NOTE 3:** Products that are listed above are primarily intended for installations in the field. Original Equipment Manufacturers (OEM's) or millwork shops may require different set and curing characteristics in an adhesive. Consult our OEM Technical Bulletin for additional information.
